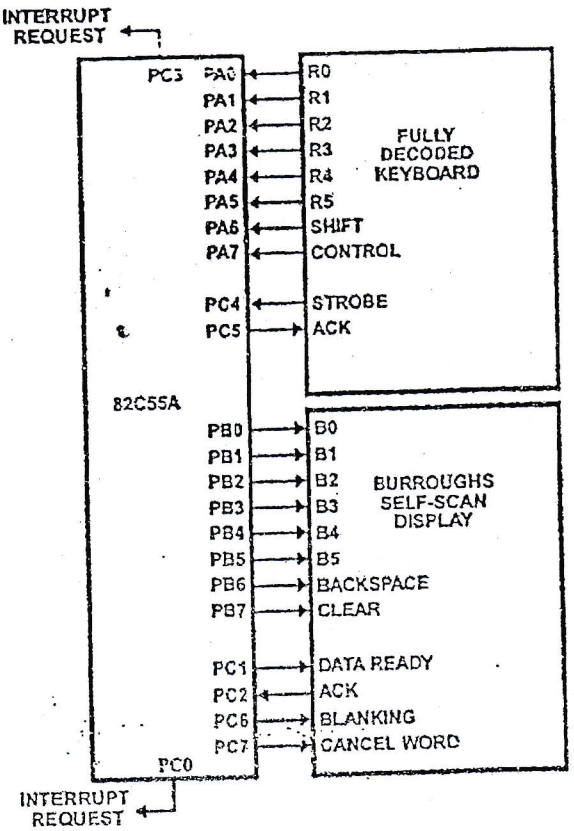
Exam.	Back		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Instrumentation II *(EX 602)*

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ *Attempt All questions.*
- ✓ *The figures in the margin indicate Full Marks.*
- ✓ *Assume suitable data if necessary.*

1. a) Explain microprocessor based instrumentation system with its block diagram. [5]
   b) List out the factors to be consider while selecting a processor. [3]
2. An 8255A PPI card is connected to 8085 microprocessor has system as shown in figure below in which control word is stored in address of F3H. [1+3+2+2+2]
   a) What are the addresses captured by 8255A PPI card?
   b) Draw the minimum interfacing circuit.
   c) Write down the control word to initialize the 8255A PPI card.
   d) Write down the status word format for 8255A PPI card for the system.
   e) Write down BSR control word to initialize port A interrupt request.



3. a) What is the importance of RS 232-C in serial communication? Explain the RS 232-C working principle with its different types of signals. [1+4]

b) What is USB? Explain its common packet fields. [1+3]

4. a) Describe INL and DNL error of data converter with necessary illustrations. [4]

   b) With necessary diagram, Explain interfacing of 8 channel 8 bit ADC with 8085 microprocessor along with timing diagram. [5]

5. a) Discuss analog communication system and digital communication system with an appropriate block diagram. [4]

   b) Mention the characteristics of Bluetooth. Differentiate between piconet and scatternet network topology used in Bluetooth environment. [4]

6. a) What will happen to the electronic circuit connected in single point ground system when operated in frequency greater than 1 MHz? Explain with necessary illustration. [3]

   b) Explain how decoupling capacitor can be used to suppress the transient current. What effects do you observe when very large decoupling capacitor is connected in your circuit? [3+2]

7. a) What is reliability? List out the factor affecting reliability. [1+2]

   b) What are the factors that need to be considered while designing high speed circuit. [3]

8. How do you reduce crosstalk when routing signal traces on a PCB? [4]

9. Explain different types of software bugs that might exist in software. How these bugs can be identified while implementing different types of software testing. [6]

10. Explain existing industrial process control system involved in your case study with necessary block diagram. Recommend the changes that you deem necessary for the improvement of overall system performance. Explain why management should implement these changes. What are the probable problems you might face after implementation of your recommended system? [12]
