12 TRIBHUVAN UNIVERSITY
INSTITUTE OF ENGINEERING
Examination Control Division
2074 Chaitra

Exam.	Regular		
Level	BE	Full Marks	80
Programme	BEL, BEX, BCT, B.Agri.	Pass Marks	32
Year / Part	III / I	Time	3 hrs.

Subject: - Probability and Statistics *(SH602)*

- ✓ Candidates are required to give their answers in their own words as far as practicable.
- ✓ *Attempt **All** questions.*
- ✓ *The figures in the margin indicate **Full Marks**.*
- ✓ ***Necessary tables are attached herewith.***
- ✓ *Assume suitable data if necessary.*

1. What are measures of central tendencies? Write favorable points of each of them. Calculate approximate measures of central tendency from following data; [1+2+3]

Wages in Rs/ week	Less than 35	35-37	38-40	41-43	Over 43
No. of wage earned	14	82	99	18	7

2. From a group of 4 Engineers, 3 Doctors and 2 Statistician a sub-group of 3 has to be made, what is the probability that sub-group consists of
   a) One from each profession
   b) Atleast one engineer [4]
3. Define discrete probability distribution with suitable example. Compare Negative Binomial and Binomial probability distributions. [3+3]
4. A quality control engineers inspects a random sample of 3 batteries from each lot of 24 car batteries that is ready to shipment. If such a lot contain six batteries with slight defects, what is the probabilities that the inspector's sample will contain
   a) None of the batteries with defect
   b) Only one of the batteries with defect
   c) At least two of the batteries with defect [6]
5. Write major characteristics of normal distribution. Discuss relation between Normal distribution and Standard Normal distribution. [2+3]

OR

What are Gamma and Chi-squared distributions? Specify relationship between them.

6. The life of an electric light bulbs follows Normal distribution with mean 800 hours and a standard deviation of 50 hours. Find the probability that a bulb burns
   a) Between 750 and 825 hours
   b) More than 900 hours [5]

OR

Define exponential distribution. Suppose that the service life of a semiconductor is exponentially distributed with an average of 60 hours. Find the probability that a semi-conductor will a) still working after 90 hours
b) fail within 120 hours

7. A population consists of five numbers 2, 4, 6 and 8
   a) Enumerate all possible sample of size two without replacement
   b) Show that the mean of the sampling distribution of sample mean is equal to population mean [4]

8. State central limit theorem. A random sample of size 100 is taken from an infinite population with mean 75 and variance 256. Assert the chances of sample mean between 67 and 83. [6]

9. What is type Ist error? Describe the procedure of the for difference of two Mean for large sample. [6]

10. Define chi-square distribution. A book containing 500 pages, was thoroughly checked. The distribution of number of error page was given below as

Number of errors:	0	1	2	3	4	5
Number of pages:	275	138	75	7	4	1

Using chi-square test of goodness of fit, verify whether the arrivals follow a poison distribution at 5% level of significance. [6]

11. Define hypothesis. Describe the procedure of testing of hypothesis of significant difference between two population means for large samples.

OR

Describe the types of error in Hypothesis Testing. Write the procedure testing of Hypothesis of single proportion. [6]

12. Write the Decision criteria in test of Hypothesis with diagram. [4]

13. In trying to evaluate the effectiveness of antibiotics in killing bacteria, a research institute compiled the following information

Antibiotics (mg)	12	15	14	16	17	10
Bacteria	5	7	5.6	7.2	8.6	6.2

Find strength and direction of relationship between them. [4]

14. Differentiate between Correlation and regression analysis. [4]

15. Following data revels the scores of sixty candidates of IOE entrance examination

51.43	40	78.57	46.43	51.43	50.71
42.14	50.71	42.86	55	71.43	64.29
52.86	42.14	57.14	45.71	43.57	40
44.29	55.71	40	48.57	48.57	49.29
51.43	47.14	54.29	45	53.57	50
49.29	60	48.57	50.71	50	49.29
47.14	53.57	58.57	43.57	47.14	53.57
47.86	47.14	40	43.57	52.86	47.86
49.29	49.29	42.86	47.14	48.57	50
47.14	50.71	52.86	47.86	47.14	70

a) Estimate average score of candidates
b) Find unbiased estimator of true standard deviation and standard error of average score
c) Also test for consistency of score [8]
